Priority PayRight Health Integration Engine

The PayRight Integration Engine is a Robotic Process Automation (RPA tool) designed to exchange payment related information between a practice management system (PMS) and payment gateway. Once a PMS is mapped, the workflow is available to other users but new PMS systems, or alternative workflows, can be mapped at implementation. If a person can see it and access on a screen, PayRight can map it. Custom mappings are available for various use cases.

Mapped PMS systems
- **Dental**
    - Dentrix 16.6 (6.6)
    - Dentrix 17.2 (7.2)
    - EagleSoft 21.0
    - OpenDental 18.3
- **Medical**
    - NextGen
