

ADVANTAGE SERVICE FEE

Recoup the cost of providing a service.

The costs associated with running a government or educational business continues to increase and finding creative ways to recoup those costs can be challenging.

Priority's proprietary application, **MX™ Advantage for Service Fee**, provides merchants with the ability to apply a service fee which is an additional fee added to a customer's bill when a credit card and debit is used for payment and helps merchants offset the cost of providing a service.

Utilize the virtual terminal, MX™ Quick Pay and a card reader, or pair MX™ Advantage for Service Fee with the Dejavo Z series, to continue saving by obtaining swiped rates vs keyed.

The MX™ Advantage for Service Fee is integrated with the following Dejavo solutions:

- Z3 PIN Pad / Terminal
- Z6 PIN Pad / Terminal
- Z8 - Countertop Ethernet & WiFi
- Z9 - 3G/4G & WiFi
- Z9 - WiFi Only
- Z11 - Countertop

And to add value and create customer loyalty, the MX™ Advantage for Service Fee integrates seamlessly with these MX™ products:

- MX™ Invoice
- MX™ Payment Links
- MX™ QuickBooks Sync
